

STOP!

Capitalism-Imperialism from Destroying Our Planet!

Climate change driven in large part by capitalism-imperialism's burning of fossil fuels is increasingly causing a global environmental catastrophe.

In Nigeria, giant oil corporations control the oil economy, and raging oil fires and leaks are common, killing people and ruining crops.

Climate change is causing greater destructive storms, droughts, and other extreme weather events, hitting the poorest regions of the world the hardest. Above: flooded village in northeast India after a monsoon, August 2017.
