

"We are the wealthiest country in the history of the world, and we can create an economy where nobody who works 40 hours a week lives in poverty, where health care is a right for all Americans, and where kids of all backgrounds can go to college without crushing debt."

Photo: Gage Skidmore

**Where does the wealth Bernie Sanders talks about come from? From child laborers slaving in coffee fields, cocoa plantations and fisheries in Asia, Africa, and Latin America. From women dying a slow death in sweatshops of Bangladesh or Vietnam. From the poisoning of the environment for petroleum profits. This and much more is why the USA is "the wealthiest country in the world."**

**So STOP thinking about how big a cut Americans can get from these horrors. START thinking about humanity, and how to get to a world without these horrors.**
