The much-proclaimed democracy under this system is a sham, and worse—it promotes the illusion that it is expressing “the will of the people,” while really involving the people in “legitimizing” the rule of a rapacious and murderous class of capitalist-imperialists, who dominate and shape the electoral process, and political decision-making overall, and whose rule is in reality a dictatorship that fundamentally relies on brutally oppressive force and violence.

Bob Avakian

Chairman, Revolutionary Communist Party, USA
