

Bob Avakian has made a historic breakthrough for human emancipation.

The world is a nightmare for billions: millions driven from their homes by wars, poverty, environmental devastation... women raped, beaten and degraded... Black and Brown youth routinely murdered by police and incarcerated... immigrants demonized and torn from their families... environmental catastrophe...

These problems stem from and are woven into the system of capitalism-imperialism. Solving them requires overthrowing this system through an actual revolution.

Making an actual revolution – and building a radically new and far better society and world – is complex. It requires science – a method and approach to understand reality as it actually is, and how it can be changed. And it requires leadership based on this science. Without this, even the most heroic struggles remain locked within this system's confines, and the world remains fundamentally unchanged.

Shattering these confines is the work and leadership of Bob Avakian (BA). Over four decades, BA has developed a **new synthesis of communism.** This new framework represents and embodies the scientific understanding and approach needed to make an actual revolution that emancipates all of humanity.

This needs to be known **everywhere.** This is the goal of the **BA Everywhere** fundraising campaign. **Imagine the difference it would make!**

Imagine if U.S. imperialism and Islamic fundamentalism weren't the only choices known to millions. *Imagine* people seeing beyond this system's official politics and "lesser of two evils" logic. *Imagine* if science - and a scientific approach to knowing and radically changing the world - were a point of reference from the prisons to the housing projects to the universities. *Imagine* if new generations lifted their sights to a world free of all exploitation and oppression.

BA's work is controversial in a good way, stirring up discourse, challenging conventional wisdom. And *BA Everywhere is essential* to a better future – for the concrete leadership and approach he is providing, and for the broad questions, elevated sights and liberating culture this sparks.

“ People look at what religion calls 'the heavens.' They look at the stars, the galaxies. They can see a small part of the vastness of the universe, and they can imagine the greater vastness of the universe. Or they can look on a small scale, look with a microscope and see a small microbe or whatever, and be amazed by what goes on internally within that. They can ponder the relation between what you can see with a microscope and what you can see with a telescope. This is an essential quality of human beings. Human beings will always strive for this. Far from trying to suppress this, or failing to recognize it, we can and should and will give much fuller expression to it.

“ Communism will not put an end to—nor somehow involve the suppression of—awe and wonder, the imagination, and “the need to be amazed.” On the contrary, it will give much greater, and increasing, scope to this. It will give flight on a much grander scale to the imagination, in dialectical relation with—and in an overall sense as a part of—a systematic and comprehensive scientific outlook and method for comprehending and transforming reality.”

Basics 4:30, from the talks and writings of Bob Avakian

A major new work by Bob Avakian

**THE SCIENCE, THE STRATEGY, THE LEADERSHIP
FOR AN ACTUAL REVOLUTION,
AND A RADICALLY NEW SOCIETY
ON THE ROAD TO REAL EMANCIPATION**

Available now at www.revcom.us

Bob Avakian is the Chairman of the Revolutionary Communist Party and is leading the movement for an actual revolution in the U.S., theoretically and practically.

On the basis of scientifically summing up the socialist revolutions of the 20th century, and drawing from broader inquiry, including advances in science, history, philosophy, and culture, Bob Avakian has developed a new synthesis of communism. While building on the previous experience of communist revolution, this new synthesis is also a leap beyond and, in some important dimensions, a rupture with what came before – enabling humanity to do even better in the revolutions to come.
