Climate destruction... the threat of nuclear war... police murder of Black and Brown people... patriarchal violence... inhuman attacks on immigrants... **If you care — and you do: There is the possibility of wrenching a positive emancipating future out of the existential crises, the madness of today. At a time when revolution really could be possible.**

We are determined to put revolution on the map in this country in 2023 in a way it has not been for a long, long time, if ever.

In his three interviews on *The RNL — Revolution, Nothing Less! — Show*, the revolutionary leader Bob Avakian (BA), makes the case for why the times themselves cry out for revolution. BA breaks down what the revolution is all about, and why and how it is possible. In the interviews, people get to know this leader, and BA tells how he came to recognize and fill a great need—charting a course for a real revolution here in the most powerful country in history and developing a new framework for the emancipation of humanity which we call the new communism.

What could be more important than to donate to a movement for revolution which aims to bring about a whole new world without exploitation or oppression of any kind?

Your donation will:

- ▶ **Promote the Bob Avakian Interviews on The RNL Show** (voice of the Revcoms) opening a doorway into the revolution for thousands, potentially millions. Expand the audience of **The RNL Show**.
- ▶ **Produce the website, revcom.us** where you get unique analysis of major events and trends, learn about the revolution and how to be part of it, and find the major works of Bob Avakian.
- ▶ **Support revolutionary leaders and committed young revolutionaries** in Los Angeles, developing a model of putting revolution on the map that can be replicated and grow nationally.

In a Time When the Future Hangs in the Balance When Solutions Offered End Up with the Horrors Going On and On... There Is Hope, and a Roadmap

Why people are donating

“Please join me in donating to get this interview out to more people, and popularize it in ways that shake up people’s prejudices and assumptions, stir up debate and discussion, and unleash inspiration, purpose, and hope among those who could become the force that could take this beast down.”

“As long as they keep killing our kids, we have to keep fighting. We can’t give up. We have to raise money because without the revolutionary club there is no one there to fight for us.”
